Chapter 01  General introduction  
1.1 Chronic low back pain  
1.2 Interventions for chronic low back pain  
1.3 Outcomes of interventions for chronic low back pain  
1.4 Aims and Outline of this thesis  

Theme A: Introduction of a combined physical and psychological programme  

Chapter 03  A short, intensive cognitive behavioral program for pain management improves long term daily functioning, quality of life and reduces healthcare use in patients with Chronic Low Back Pain. *European Spine Journal* 2012; 21(7): 1257-64  

Chapter 04  Predictive factors for successful clinical outcome one year after an intensive pain management programme for chronic low back pain. *European Spine Journal* 2014; 23(1):102-12  

Theme B: Outcomes assessment  

Chapter 05  Evidence and practice of spine registries – A systematic review and recommendations for future design of registries. *Acta Orthopaedica* 2015; 86(5): 534-44  

Chapter 06  A proposed set of metrics for standardized outcome reporting in the management of low back pain. *Acta Orthopaedica* 2015; 86(5): 523-33  

Theme C: Prediction of outcomes

Chapter 10  Patient-reported factors partly predicted referral to spinal surgery in a consecutive cohort of 4,987 chronic low back pain patients. *[Under review]*

Chapter 11  Prognostic patient-reported profiles for referral to secondary or tertiary spine specialists – The Nijmegen Decision Tool for Chronic Low Back Pain. *[Submitted]*

Chapter 12  Summary & General discussion
