Contents

Chapter 1  General introduction  7
Chapter 2  Assessing gait adaptability in people with a unilateral amputation on an instrumented treadmill with a projected visual context  21
Chapter 3  Adaptability treadmill training for practicing functional walking ability: from technological innovation to clinical application  43
Chapter 4  Step by step: a proof of concept study of C-Mill gait adaptability training in the chronic phase after stroke  53
Chapter 5  Improved gait adjustments after gait adaptability training are associated with reduced attentional demands in persons with stroke  73
Chapter 6  Functional gait rehabilitation in elderly people following a fall-related hip fracture using a treadmill with visual context: design of a randomized controlled trial  97
Chapter 7  Adaptability treadmill training, conventional treadmill training and usual physical therapy in older adults after fall-related hip fracture: a randomized controlled trial of participants’ attitudes and amount of walking practice  121
Chapter 8  The efficacy of treadmill training with and without projected visual context for improving walking ability and reducing fall incidence and fear of falling in older adults with fall-related hip fracture: a randomized controlled trial  157
Chapter 9  Epilogue  199
