# Table of Contents

**1. General introduction**  
Summary  
Introduction  

**2. The History of a Stress Episode**  
Summary  
Introduction  
Materials and Methods  
In vitro experimentation  
Model generation and validation  
Results  
Impact of GR-mediated feedback regulatory signal on network dynamics  
Impact of GR-mediated feed forward regulatory signal  
Dynamics of the network following multiple stress episodes  
Adaptation to chronic stress is re-enforced through low stress periods  
Basal cortisol concentration and the response to chronic stress  
Preconditioning and Responses  
Preconditioning: PROP and REP  
Discussion  
Supplementary Figures  
Supporting information  

**3. Stress, Circadian Rhythms and Preconditioning**  
Summary  
Introduction  
Materials and Methods  
Results  
Model development and validation for the stationary circadian state  
Impact of acute stress episodes on glucose metabolism  
Impact of circadian desynchrony on glucose metabolism  
Impact of preconditioning on the relation between stress and glucose metabolism  
Preconditioning: PROP and REP  
Discussion  
Supplementary Figures  
Supplementary Figure S3.1  
Supplementary Figure S3.2
4. The tale of a mitochondrion: hero or villain? 107

Summary 108
Introduction 109
Materials and Methods 113
Model generation 113
Results 120
Death probability, Stimuli and Visible Internal Response Relationship 120
The Hypothesis: Mitoptosis versus Apoptosis 122
The Hypothesis: Validation in silico 124
The Hypothesis: Sensitivity analysis 130
Dynamic ROS challenges 132
Preconditioning: PROP and REP 138
Discussion 147
Supplementary Figures 152
Supporting information 153

5. General Discussion 155

Bibliography 163

Nederlandse Samenvatting 185
