

KNOWLEDGE REPRESENTATION FOR CLINICAL
GUIDELINES

with applications to Multimorbidity Analysis and Literature Search

VERUSKA ZAMBORLINI

SIKS Dissertation Series No. 2017-25

The research reported in this thesis has been carried out under the auspices of SIKS, the Dutch Research School for Information and Knowledge Systems.

The PhD candidate has been funded by CNPq (Brazilian National Council for Scientific and Technological Development) within the Science without Borders programme and supported by both the Vrije Universiteit Amsterdam and the Luxembourg Institute of Science and Technology. The cover was designed by Ingrid Arcas Sanz.

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad Doctor aan
de Vrije Universiteit Amsterdam,
op gezag van de rector magnificus
prof.dr. V. Subramaniam,
in het openbaar te verdedigen
ten overstaan van de promotiecommissie
van de Faculteit der Exacte Wetenschappen
op woensdag 27 september 2017 om 13.45 uur
in de aula van de universiteit,
De Boelelaan 1105

door

VERUSKA ZAMBORLINI
geboren te Santa Teresa, Brazilië

promotor: prof.dr. F.A.H. van Harmelen
copromotoren: dr. A.C.M. ten Teije
dr. C. Pruski
dr. M. da Silveira

promotiecommissie:

prof.dr. A. Th. Schreiber, Vrije Universiteit Amsterdam

prof.dr. P. Terenziani, Univ. del Piemonte Orientale "Amedeo Avogadro"

prof.dr. A. Abu-Hanna, AMC, Universiteit van Amsterdam

prof.dr. A. Dekker, Universiteit Maastricht

prof.dr. J. Burgers, Universiteit Maastricht

Dedicated to my family, whose support is an essential part of my character and my career.

Specially dedicated to my nieces and nephews, for 'understanding' my choices and my absence in their own way:

- Brother: What do you wanna be when you grow up, son?
 - Nephew (8y.o.): I wanna be like my aunty.
- Brother: And what do you think your aunty is?
 - Nephew: She is an adventurer!

ACKNOWLEDGMENTS

Pursuing a PhD degree is recognizably a difficult enterprise. In addition, moving to the other side of the world, far from family and friends, adapting to a new culture, climate, bureaucracies etc. make of this moment, this thesis, a victory that for many times I doubted to be achievable. Naturally, in this trip of mine I have had allies... some persistent, others occasional... I am ever grateful for all the emotional, intellectual and financial support I have been provided with.

I am afraid I cannot possibly name everyone that played a role in this process, but I can mention a few. Starting with my family: that has always given me the most important fuel to stay in orbit - love. My parents, Antonio and Rita, together with my brother Leo, my sister Kamila and their families have always supported my dreams, even though they happen to bring us physically apart. Moreover: Roberta and Magnos indicated me to this PhD position; as I was freaking out about applying to the PhD position, Tina told me *'apply first and freak out if you are accepted'* and Ze told me *'you are already a researcher, yet you don't know it'*; Ro has always kindly supported and believed in me; Gian, Renata, João, Patricia and Zambon helped convincing me that the Netherlands was not as 'cold' I as thought. In general, professors and students from NEMO and UFES that were always open to receive me, listen and discuss research challenges that came in my way. In particular, I thank Evellin Cardoso and Bernardo Braga for so many interesting discussions. Finally I am grateful to have found a second home always open for me in the Netherlands, from my Brazilian-Dutch couple Paulinha and Bjorn.

People say that a dog with too many owners starves. I am incredibly lucky to have had four supervisors that have managed so nicely to advise me in this process, not pushing me to their own directions, but instead inspiring me to find my direction having them as support. For many times they believed in me more than I did myself. As if it was not enough, they have also supported me beyond the research, and I can never be grateful enough. Just to mention a few occasions that I will not forget: Marcos supported me for the interview process, helping me to feel confident; Cedric gently picked me up at the airport; both supporting me with my adaptation during my first days in Luxembourg; Annette and Frank so nicely received me in Amsterdam, even though I showed up one week earlier as I confused 'next Friday' with 'this Friday'; Annette so attentive and caring about my adaptation; and the adorable

initiative by Frank and family to invite for Christmas dinner the foreign PhD students that didn't have the chance to go back home. Annette supported my viewpoint in our very first meeting altogether in Murcia, while Frank told me that I should not always listen to him, but I should better prove him wrong if he happened to doubt an idea that I believed in.

Warmly, new people took part in this trip. The lovely couple Julio and Laira who hosted me in Luxembourg several times and helped me moving to Amsterdam. My officemates Wouter, Steven, Albert, Laurens, Rinke, Hamid, Wytze, Kathrin, Qing and Huiqin (yes, I've moved around a lot), besides Ronald, Niels, Sara, Martine, Victor, Anna, Dena, Anca, Chris, Filip, Paul, Tobias, Antske, Ali, Klaas and others with whom I've had the chance to share very nice and interesting discussions. In particular the valuable support by Rinke, Jan, Qing, Zhisheng and Edwin, with whom I've had the chance to transform nice discussions into collaborative papers. I'm also grateful for the support by Al on practicing my presentations and handling my anxiety about it, as well as for Wytze's patience on reading my submissions. And I was so honored to have been Albert's paranymph, and I'm glad for the support he gave me in the process of adjusting the thesis for printing, as well as for the great work Ingrid did for my thesis cover.

It was a very enriching experience to be part of the Semantic Web group at the VU, and to have had the chance to attend the regular seminars about the research conducted by the entire A.I. group. Thank you guys for the lunches, dinners, coffees and picnics, cinema and concerts as well as a brunch with Kathrin and Krystyna for which I brought wine because I thought it was a kind of lunch; and even an attempt to Krav Maga self-defense training with Sara. But also for the support I've got when moving house; understanding dutch letters about housing, taxes, etc. Among several researchers that I came across, I'd like to express my gratitude to prof.md. Airton Stein for several discussions that I hope one day we will further investigate to improve access to clinical knowledge in Brazil. At a certain point, a lively group of Brazilian PhD students came to Amsterdam: thanks Eric, Daniel, Lenin, Claudia and others for the support and invitations, even though I couldn't keep up with your pace. Finally, my special thanks to Qing, Al and Wytze for seeing me through.

Last but not least, thanks to the examination committee, professors Schreiber, Terenziani, Abu-Hanna, Dekker and Burgers for dedicating your time to participate in my graduation.
