# TABLE OF CONTENTS

Chapter 1 General introduction.  
Part 1 Maternal pregnancy health and the offspring’s early growth  
Chapter 2 Relation of maternal hypertension with infant growth in a prospective birth cohort.  
Part 2 Validation of assessment of body composition, one of the outcome measures  
Chapter 3 Validation of total body water analysis by bioelectrical impedance analysis with deuterium dilution in (pre)school children.  
Part 3 Associations of early growth and infant feeding with childhood cardiovascular risk factors  
Chapter 4 Associations of infant feeding and timing of weight gain and linear growth during early life with childhood blood pressure: findings from a prospective population based cohort study.  
Chapter 5 Associations of infant feeding and timing of linear growth and relative weight gain during early life with childhood body composition.  
Chapter 6 Associations of infant feeding and timing of growth in early life with childhood glucose and lipid biomarkers.  
Chapter 7 General discussion
