
TABLE OF CONTENTS

Chapter 1 General introduction and outline of thesis

Part I An outbreak of *Clostridium difficile* infection

Chapter 2 An outbreak of *Clostridium difficile* ribotype 027 associated with length of stay in the intensive care unit and use of selective decontamination of the digestive tract: a case control study
PLOS ONE 2016

Chapter 3 Host factors are more important in predicting recurrent *Clostridium difficile* infection than ribotype and use of antibiotics
Clinical Microbiology and Infection 2017

Chapter 4 Cost-analysis of an outbreak of *Clostridium difficile* infection in a tertiary care center
Journal of Hospital Infection 2016

Part II Prediction tools for complications after *Clostridium difficile* infection

Chapter 5 External validation of three prediction tools for patients at risk of a complicated course of *Clostridium difficile* infection: disappointing in outbreak setting
Infection Control and Hospital Epidemiology 2017

Chapter 6 Predicting recurrence of *Clostridium difficile* infection by on-site profiling of fecal volatile organic compounds
Submitted

Part III Fecal Microbiota Transplantation for *Clostridium difficile* infection

Chapter 7 Complications, effectiveness, and long-term follow up of fecal microbiota transfer by nasoduodenal tube for treatment of recurrent *Clostridium difficile* infection
United European Gastroenterology Journal 2016

Chapter 8 Current challenges in the treatment of severe *Clostridium difficile* infection: early treatment potential of fecal microbiota transplantation
Therapeutic Advances in Gastroenterology 2017

Chapter 9 Serial microbiota analysis after fecal microbiota transplantation in a child with Down syndrome
Journal of Pediatric Infectious Disease 2017

Part IV Fecal Microbiota Transplantation: other indications and the development of the Netherlands Donor Feces Bank

Chapter 10 Fecal microbiota transplantation: indications in perspective
Nederlands Tijdschrift voor Geneeskunde 2017

Chapter 11 Fecal microbiota transplantation as treatment for post-infection and antibiotic induced irritable bowel syndrome: a pilot study
Submitted

Chapter 12 Serendipity in refractory celiac disease: full recovery of duodenal villi and clinical symptoms after fecal microbiota transfer
Journal of Gastrointestinal and Liver Disease 2016

Chapter 13 How to: Establish and run a stool bank?
Clinical Microbiology and Infection 2017

Part V Discussion and summary

Chapter 14 Summary of results and general discussion

Chapter 15 Dutch summary / Nederlandse samenvatting
