## Contents

**Part I: Introduction** 01  
Chapter 1: Introduction 03

**Part II: Modeling Different Aspects of Affective and Cognitive Processes for a Healthy Lifestyle** 29  
Chapter 2 - Modeling the effect of regulation of negative emotions on mood 31

Chapter 3 - A Computational Temporal-Causal Network Cognitive Model Integrating Different Emotion Regulation Strategies for Different Personal Characteristics 55

Chapter 4 - Monitoring the Impact of Negative Events and Deciding about Emotion Regulation Strategies 83

Chapter 5 - Formalization of Knowledge about Behavior Change 101

**Part III: Social Contagion and its Role in Health Behavior** 117  
Chapter 6 - An agent-based model for integrated emotion regulation and contagion in socially affected decision making 119

Chapter 7 - Effect of changes in the structure of a social network on emotion contagion 145

Chapter 8 - Online sharing of physical activity: does it accelerate the impact of a health promotion program? 163

Chapter 9 - Explaining Changes in Physical Activity Through a Computational Model of Social Contagion 181
Part IV: A Prototype Integrating Modern Technology with Evidence-Based Research

Chapter 10 - Real-life validation of methods for detecting locations, transition periods and travel modes using phone-based GPS and activity tracker data

Chapter 11 - Active2Gether: a Personalized m-Health Intervention to Encourage Physical Activity

Part VI: Discussion

Chapter 14: Discussion
