CONTENTS

Chapter 1
General Introduction 9

Chapter 2
Designing a novel dental root analogue implant using cone beam computed tomography and CAD/CAM technology. (Clinical Oral Implants Research) 17

Chapter 3
A novel approach for custom 3D printing of a zirconia root analog implant by digital light processing. (Clinical Oral Implants Research) 27

Chapter 4
Accuracy of preemptively constructed, Cone Beam CT-, and CAD/CAM technology-based, individual Root Analogue Implant technique: An in vitro pilot investigation. (Clinical Oral Implants Research) 39

Chapter 5
A patient specific biomechanical analysis of custom root analogue implant designs on alveolar bone stress: a finite element study. (International Journal of Dentistry) 49

Chapter 6
Immediate non-submerged custom root analogue implants: proof of concept in the first 5 cases. (International Journal of Oral and Maxillofacial Implants) 63

Chapter 7
Computer-assisted template-guided custom designed 3D printed implant placement with custom designed 3D printed surgical tooling. An in-vitro proof of a novel concept. (Clinical Oral Implants Research) 77

Chapter 8
Chapter 9
Replacing heavily damaged teeth by third molar autotransplantation with the use of cone-beam computed tomography and rapid prototyping. (Journal of Oral and Maxillofacial Surgery)

Chapter 10
Autotransplantation of teeth with the aid of computer-aided rapid prototyping using a 3D replica of the donor tooth: a systematic literature review. (International Journal of Oral and Maxillofacial Surgery)

Chapter 11
A novel approach for computer-assisted template-guided autotransplantation of teeth with custom 3D designed/printed surgical tooling. An ex vivo proof of concept. (Journal of Oral and Maxillofacial Surgery)

Chapter 12
Accuracy of computer-assisted template-guided autotransplantation of teeth with custom 3D designed/printed surgical tooling. A cadaveric study. (Journal of Oral and Maxillofacial Surgery)

Chapter 13
Computer-assisted template-guided autotransplantation of a third molar with custom 3D designed/printed surgical tooling: A case report. (Journal of Oral and Maxillofacial Surgery)

Chapter 14
Summary and Closing Remark
