Cyber-offenders versus traditional offenders

An empirical comparison
# Table of contents

## Chapter 1: General introduction

1.1 Introduction  
1.2 Cybercrime  
1.3 Traditional explanations for offending  
  1.3.1 Offending over the life-course  
  1.3.2 Personal and situational correlates of offending and victimisation  
  1.3.3 Similarity in deviance of social network members  
  1.3.4 Clustering of offending and motivations for offending  
1.4 Cyber-offenders versus traditional offenders  
1.5 Contribution to research on cybercrime  
1.6 Data used in this dissertation  
  1.6.1 Longitudinal life-course registration data  
  1.6.2 Cross-sectional survey  
1.7 Dissertation overview  
  1.7.1 Longitudinal life-course study (Chapter 2)  
  1.7.2 Correlates of offending, victimisation, and victimisation-offending  
    (Chapter 3)  
  1.7.3 Similarity in deviance of social network members (Chapter 4)  
  1.7.4 Clusters of offences and related motivations (Chapter 5)

## Chapter 2: Cyber-offending and traditional offending over the life-course: An empirical comparison

2.1 Introduction  
  2.1.1 Offending over the life-course  
  2.1.2 Cybercrime  
  2.1.3 The current study  
2.2 Data and methods  
  2.2.1 Data  
  2.2.2 Dependent variables  
  2.2.3 Independent variables  
  2.2.4 Analytical strategy  
2.3 Results  
  2.3.1 Descriptive and bivariate analyses  
  2.3.2 Fixed effects logit models  
2.4 Conclusion and discussion  
2.5 Appendix: dataset composition
