

CONTENT

Chapter 1	General introduction	9
------------------	----------------------	----------

Effects of HPV vaccination from a monitoring perspective

Chapter 2	High effectiveness against incident and persistent HPV infections of the bivalent human papillomavirus vaccine up to six years post-vaccination in a cohort of young Dutch females	41
------------------	--	-----------

Chapter 3	Changes in (risk) behavior and HPV knowledge in a cohort of vaccinated and unvaccinated girls eligible for HPV vaccination in the Netherlands	67
------------------	---	-----------

Monitoring the introduction of the two-dose HPV vaccination schedule

Chapter 4	Inconclusive evidence for non-inferior immunogenicity of two- compared with three-dose HPV immunization schedules in preadolescent girls: a systematic review and meta-analysis <i>Journal of Infection, 2015</i>	89
------------------	--	-----------

Chapter 5	Immune responses after two- versus three-doses of HPV vaccination up to 4 ½ years post vaccination: an observational study among routinely vaccinated Dutch girls <i>Journal of Infectious Diseases, 2017</i>	115
------------------	--	------------

Chapter 6	An exploration of individual and population-level impact of the two-dose HPV vaccination schedule in pre-adolescent girls <i>Human Vaccines and Immunotherapeutics, 2016</i>	137
------------------	---	------------

Chapter 7	Persistence of immune response following bivalent HPV vaccination: a two-year follow-up study among girls routinely vaccinated with a two-dose schedule	165
------------------	---	------------

Methodological challenges in monitoring of vaccination

Chapter 8	Comparing vaccines: A systematic review of the use of the use of the non-inferiority margin in vaccine trials <i>Vaccine, 2015</i>	185
------------------	---	------------

Chapter 9	Measuring vaccine effectiveness against persistent HPV infections in observational studies: methodological challenges	205
------------------	---	------------

Future perspective

Chapter 10	The whole story: the incremental costs and benefits of including non-cervical HPV-related diseases in economic evaluations of HPV vaccination- a systematic review. <i>Expert Review of Vaccines, 2016</i>	227
-------------------	---	------------

Chapter 11	General discussion	261
-------------------	--------------------	------------
