Table of Contents

Chapter 1 9

On the Design, Preparation and Utility of
Photoactive Molecules

Chapter 2 42

Synthesis, Characterization and Biological Activity of
Fluorescently Labeled Bedaquiline Analogues

Chapter 3 69

Synthesis and Photophysics of a Red Light Absorbing
Supramolecular Chromophore System

Chapter 4 101

Preparation and Characterization of Functionalizable
Cyclometalated N-phenylimidazole Iridium Complexes

Chapter 5 125

A Quantitative Analysis of Light-Driven Charge Transfer
using Voronoi Partitioning of Electron Densities

Samenvatting 158

Dankwoord 164

List of Publications 170

About the Author 171
