Preface	11
Connecting clinical practice to scientific research	
Introduction	
1. General introduction	13
Section 1. Behavioral variant frontotemporal dementia and psychiatric disorders	
2. Psychiatric disorders are not overrepresented in behavioral variant frontotemporal dementia	29
3. Psychotic symptoms in behavioral variant frontotemporal dementia	45
Section 2. Differentiating behavioral variant frontotemporal dementia from other neurodegenerative diseases and psychiatric disorders	
4. Social cognition differentiates behavioral variant frontotemporal dementia from other neurodegenerative diseases and psychiatric disorders	65
5. Clinical differentiation of psychiatric disorders from behavioral variant frontotemporal dementia	85
Section 3. Disease course in the late onset frontal lobe syndrome	
6. Psychiatric diagnoses underlying the phenocopy syndrome of behavioral variant frontotemporal dementia	107
7. Progression in late onset frontal lobe syndrome	123
Section 4. Care and interventions in late onset frontal lobe syndrome and bvFTD	
8. An intervention program for caregivers of early-onset dementia patients with frontal behavioral changes	137
9. Clinical guidance for pharmacological symptomatic interventions in behavioral variant frontotemporal dementia: A systematic review	155
Conclusion	
10. Summary and general discussion	181
11. Nederlandse samenvatting, conclusies en	201

aanbevelingen voor toekomstig onderzoek
