Assessing right ventricular function and the pulmonary circulation in pulmonary hypertension

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad Doctor aan de Vrije Universiteit Amsterdam, op gezag van de rector magnificus prof.dr. V. Subramaniam, in het openbaar te verdedigen ten overstaan van de promotiecommissie van de Faculteit der Geneeskunde op donderdag 2 november 2017 om 11.45 uur in de aula van de universiteit, De Boelelaan 1105

door

Onno Anthonius Spruijt

geboren te Amsterdam
promotor: prof.dr. A. Vonk Noordegraaf

copromotoren: dr. H.J. Bogaard
   dr. J.T. Marcus

The work presented in this thesis was performed at the department of Pulmonary Medicine of the VU University Medical Center / Institute for Cardiovascular Research, Amsterdam, The Netherlands.
## CONTENTS

1. General introduction and thesis outline
   Adapted from: Hemodynamic evaluation and exercise testing in chronic RV failure. Book: The right Ventricle in health and disease, Springer 2014

2. Predicting pulmonary hypertension using standard computed tomography angiography
   *Int J Cardiovasc Imaging 2015*

3. A simple score for predicting outcome in patients with idiopathic and drug and toxin pulmonary arterial hypertension
   *JACC Cardiovasc Imaging 2015*

4. Assessment of right ventricular responses to therapy in pulmonary hypertension
   *Drug Disc Today 2014*

5. Serial assessment of right ventricular systolic function in patients with precapillary pulmonary hypertension using simple echocardiographic parameters: a comparison with cardiac magnetic resonance imaging
   *J Cardiol 2016*

6. Treatment response in patients with idiopathic pulmonary arterial hypertension and a severely reduced diffusion capacity
   *Pulm Circ 2017*

7. Emerging modalities (MR, PET and others)

8. Lung $^{18}$FLT PET imaging depicts heterogeneous pulmonary hyperproliferation pathology: a potential biomarker for pulmonary arterial hypertension
   Submitted

9. Increased native T1-values at the interventricular insertion regions in precapillary pulmonary hypertension
   *Int J Cardiovasc Imaging 2016*

10. The effects of exercise on right ventricular contractility and ventriculo-arterial coupling in pulmonary hypertension
    *Am J Respir Crit Care Med 2015*

11. Summary and future perspectives

12. Nederlandse samenvatting
