I	Foundations	1
1	Introduction	3
1.1	Motivation	3
1.2	Background	4
1.2.1	Data Analysis	4
1.2.2	Social contagion	6
1.2.3	Modeling	7
1.2.4	Health and Social networks	10
1.3	Research questions	11
1.4	Research Methodology	12
1.4.1	Systematic review	12
1.4.2	Data collection, processing and analysis	13
1.4.3	Social network analysis	14
1.4.4	Computational modeling	14
1.5	Structure of this thesis	15
1.5.1	Part I: Foundations	15
1.5.2	Part II: Data Analytics in Networks	16
1.5.3	Part III: Using Social Contagion Models for Explaining Physical Activity	16
1.5.4	Part IV: Use of Contagion Models for Perceptions and Emotions	17
1.5.5	Part V: Discussion and evaluation	17
2	Refinement of a Temporal-Causal Network Model	23
2.1	Introduction	24
2.2	Emotion absorption: the temporal-causal network model	24
2.3	Analysis of the absorption model	27
2.3.1	Analysis of the original model	28
2.3.2	Mathematical analysis of the problem	29
2.4	Alternative ways to model the speed factor η_A	30
2.5	Mathematical Analysis	32
2.6	Results	34
2.7	Conclusion	36
II	Data Analytics in Networks	39
3	Applying machine learning algorithms for deriving personality traits in social network	41
3.1	Introduction	42
3.2	Related work	42
3.3	Social Contagion Model	43

3.4	Methods	44
3.5	Data	45
3.6	Results	46
3.6.1	Tuning the weights of the questionnaire	46
3.6.2	Tuning the traits for each participant	47
3.7	Discussion and conclusion	47
4	Analysis of Social Contagion in a Social Network	53
4.1	Introduction	54
4.2	Social Contagion Model	55
4.3	Experimental setup	56
4.3.1	Physical Activity Level	57
4.3.2	Tie Characteristics	57
4.3.3	Personality Traits	58
4.3.4	Network Structure	59
4.3.5	Data Preparation & Analysis	60
4.4	Results	61
4.5	Discussion	63
4.6	Conclusions	64
5	The effect of a community in a health promotion program	69
5.1	Introduction	70
5.1.1	Motivation	70
5.1.2	Aim	70
5.1.3	Related work	71
5.2	Methods	72
5.2.1	Data collection	72
5.2.2	Data selection	72
5.3	Results	79
5.3.1	Visual comparison	79
5.3.2	Multiple linear regression model	79
5.3.3	Linear mixed model	81
5.4	Discussion	84
5.4.1	Principal Results	84
5.4.2	Interpretation	85
5.4.3	Conclusions	86
6	Social Connection Dynamics in a Health Promotion Network	91
6.1	Introduction	92
6.2	Dynamical Social Network Analysis	92
6.3	Methods	93
6.3.1	Data Set and Data Selection	93
6.3.2	Social Network Analysis	94
6.4	Results	95
6.4.1	Nodes, edges and degree distribution	96
6.4.2	Largest component and other components	97
6.4.3	Centrality measurements	98
6.4.4	Homophily	100
6.4.5	Identifying influential participants	101
6.5	Conclusions	102

III	Using Social Contagion Models for Explaining Physical Activity	107
7	Explaining changes in physical activity through a computational model of social contagion	109
7.1	Introduction	110
7.2	Background	111
7.3	Methods	112
7.3.1	Data collection	112
7.3.2	Data preprocessing	112
7.3.3	Model simulations	113
7.3.4	Analyses	115
7.4	Results	115
7.5	Conclusions	116
8	Using Simulations for Exploring Interventions in Social Networks	121
8.1	Introduction	122
8.2	Background	123
8.3	Methods	124
8.3.1	The data	125
8.3.2	Model implementation	125
8.3.3	Building the network	127
8.3.4	Agents characteristics	129
8.3.5	Parameter tuning	131
8.3.6	Strategies for selecting targets for intervention	131
8.4	Results	134
8.4.1	Tuning of threshold and change factor	134
8.4.2	Exploring different strategies	136
8.5	Discussion	138
8.6	Conclusion	139
IV	Use of Contagion Models for Perceptions and Emotions	145
9	A Temporal-Causal Model for Spread of Messages in Disasters	147
9.1	Introduction	148
9.2	Social Contagion and Behaviour in Disaster Situations	148
9.3	Agent-based model	149
9.4	Data generation and parameter tuning	152
9.4.1	Experimental datasets	152
9.4.2	Parameter tuning methods	154
9.5	Simulations and Results	155
9.5.1	Scenario 1: Receiving a tensed and negative phone call	155
9.5.2	Scenario 2: Receiving a happy and positive text message	156
9.5.3	Scenario 3: Outputs as inputs	158
9.5.4	Mathematical analysis of the model	159
9.6	Discussions and future works	160
10	A Computational Cognitive Model for Political Positioning and Reactions in Web Media	165
10.1	Introduction	166
10.2	Psychological aspects of Political Behaviour	166

10.2.1 Political Psychology	167
10.2.2 Political Neuroscience	169
10.3 The Effect of Mood and Persuasion on Interpretation of Messages . . .	170
10.4 Agent-based model for political positioning on web media	171
10.5 Simulations	176
10.6 Discussion and future work	180
11 Detecting Dutch political tweets	187
11.1 Introduction	188
11.2 Related work	189
11.3 Collecting and processing the tweets	190
11.3.1 Collecting data	190
11.3.2 Cleaning the data	191
11.3.3 Tagging the tweets	192
11.3.4 Rule-based method	192
11.4 Structure of the classifier	193
11.5 Results	196
11.5.1 Rule-based method	196
11.5.2 Supervised learning	196
11.6 Discussion	198
V Discussion and Evaluation	203
12 Discussions and Conclusion	205
12.1 Discussion of the contributions of this thesis	205
12.2 Research questions	209
12.2.1 Research question 1	209
12.2.2 Research question 2	211
12.2.3 Research question 3	212
12.3 Limitations of this work	213
12.4 Future Work	214
12.5 Contributions and chapters overview	216
