Contents

Chapter 1. Introduction

1.1 Background: Locating the research

1.2 Objectives and scope

1.3 Overview of the dissertation

Chapter 2. A theoretical motivation for incorporating gesture into constructions

2.1 Introduction

2.2 A usage-based approach to constructions

2.3 Constructions as building blocks of language in relation to gesture
   2.3.1 A holistic view of constructions and gestures
   2.3.2 Compositionality and non-compositionality of constructions and gesture
   2.3.3 Meaning as embodied, inside and outside
   2.3.4 Meaning as conceptualization, visible in speech and gesture

2.4 The lexicon-syntax continuum and gestures

2.5 The taxonomic organization of constructions and gestures

2.6 Summary and possible ways to research multimodal constructions

Chapter 3. Previous studies on three prerequisites of multimodal constructions

3.1 Conventional, multimodal constructions

3.2 Means of event construal in constructions and gestures

3.3 Compositional multimodal constructions

3.4 Shortcomings of existing research and motivations for the present thesis
Chapter 4. Basic clausal constructions and constructional alternations in construction grammars

<table>

<td>79</td>
</tr>
</tbody>
</table>
5.3.3 Gesture rates of various categories accompanying high-transitive, intransitive, low-transitive, and copular constructions in speech .......... 81

5.4 Modes of Representation of representational gestures with respect to high-transitive, intransitive, low-transitive, and copular constructions .......... 84

5.4.1 Gestures of various modes co-occurring with high-transitive constructions .......................................................................................... 84

5.4.2 Gestures of various modes co-occurring with intransitive constructions ... 85

5.4.3 Gestures of various modes co-occurring with low-transitive constructions .......................................................................................... 90

5.4.4 Gestures of various modes co-occurring with copular constructions .... 92

5.5 Form parameters of discourse-related gestures in relation to high-transitive, intransitive, low-transitive, and copular constructions ......................... 93

5.6 Summary and conclusions ........................................................................................................................................................................... 95

Chapter 6. Gesture with the causative-inchoative alternation .......... 99

6.1 Introduction ........................................................................................................................................................................................................................................ 99

6.1.1 Background and motivation for studying the causative-inchoative alternation ................................................................................................................................. 99

6.1.2 Verbs used in the alternation and the scope of the present study .......... 100

6.2 Method ........................................................................................................................................................................................................................................ 102

6.2.1 Database ......................................................................................................................................................................................................................... 102

6.2.2 Data collection .................................................................................................................................................................................................................. 102

6.2.3 Speech coding .............................................................................................................................................................................................................. 104

6.2.4 Gesture coding ........................................................................................................................................................................................................... 105

6.3 Examples of Acting and Tracing gestures ........................................................................................................................................................................... 106

6.4 Gestures and the causative-inchoative alternation ................................................................................................................................................................. 108

6.4.1 Gestural rate .............................................................................................................................................................................................................. 108

6.4.2 Gestural Modes of Representation ................................................................................................................................................................. 109

6.5 Gestures and the causative-inchoative alternation with implicit or explicit Figure’s path .............................................................................................................................................................................. 110

6.5.1 Gestural rate .............................................................................................................................................................................................................. 110

6.5.2 Gestural Modes of Representation ................................................................................................................................................................. 112

6.6 Gestures and the causative-inchoative alternation with and without the Agent’s path .............................................................................................................................................................................. 113
8.3 Results: gestures accompanying the double object construction (DOC) and the prepositional object construction (POC) ......................................................149

8.3.1 Gestural rates of the double object construction (DOC) and the prepositional object construction (POC) .................................................................149

8.3.2 Modes of Representation of representational gestures accompanying the double object construction (DOC) and the prepositional object construction (POC) ...............................................................................................................150

8.3.3 Acting gestures accompanying the double object construction (DOC) and the prepositional object construction (POC) .........................................................152

8.4 Summary and conclusions .........................................................................................................................................................................................155

8.4.1 Gesture and the event structure (transfer events) ..............................................................................................................................................155

8.4.2 Gesture and grammatical constructions (affording different construals of transfer events) .........................................................................................156

8.4.3 Alternative explanation – the pragmatics of grammatical constructions? 157

Chapter 9. Summary and conclusions ........................................................................................................163

9.1 Summary of the findings ..............................................................................................................................................................................163

9.2 Implications of the research ......................................................................................................................................................................167

9.2.1 Representational, deictic, and discourse-related gestures in relation to grammatical constructions ..................................................................................167

9.2.2 Representational gestures in relation to semantic frames (or events) evoked by grammatical constructions and implication for the mental simulation of events ..................................................................................................167

9.2.3 Representational gestures in relation to event construal afforded by grammatical constructions and implication for gesture production models ..................................................................................................................168

9.2.4 Multimodal constructions (transitivity and the dative alternation) in construction grammars: “Code manifestation” & multimodality and “variable multimodality” .............................................................................170

9.2.5 A multimodal approach to conceptual semantics of constructions in construction grammars .......................................................................................................171

9.3 Future research directions ............................................................................................................................................................................172
Bibliography..................................................................................................................175

Summary of the dissertation ..........................................................................................191
