CONTENTS

1. Introduction ................................................................................................................. 1

1.1. Problem description ............................................................................................... 1

1.2. Aims, objectives and restrictions ........................................................................... 2

1.3. Overview of dissertation ....................................................................................... 5

2. Wetland archaeology ................................................................................................. 7

2.1. Introduction ............................................................................................................. 7

2.2. Wetland sites complexities: Lakes .......................................................................... 7

2.2.1. Sediments composition ..................................................................................... 7

2.2.2. Formation processes of archaeological lacustrine settlements ......................... 10

2.3. Living in the wetlands ............................................................................................ 12

2.4. The importance of wetlands as archaeological landscapes .................................... 13

2.4.1. Introduction ....................................................................................................... 13

2.4.2. The role of wetlands during the antiquity .......................................................... 14

2.5. Wetland sites in Greece .......................................................................................... 18

2.5.1. Introduction ....................................................................................................... 18

2.5.2. Wetlands in the ancient Greek world ................................................................. 19

2.6 Conclusions .............................................................................................................. 21

3. Literature review ........................................................................................................ 23

3.1. The theoretical framework: The early research and the Pfahlbauproblem ............ 23

3.1.1. Man and the lacustrine setting ......................................................................... 24

3.2. Methodological framework ................................................................................... 30

3.2.1. The lake dwellings sites .................................................................................. 30

3.2.2. The lake level reconstructions ........................................................................ 34

3.2.3. Conclusions ...................................................................................................... 37

4. Research design and data collection .......................................................................... 41

4.1. Introduction ............................................................................................................. 41

4.2. Materials and Methods ........................................................................................ 41
4.2.1. Coring equipment and sampling strategy .......................................................... 41
4.2.2. Micromorphology tools and materials-the sampling strategy.......................... 44
4.2.3. Chronology ........................................................................................................ 44
4.2.4. Laboratory sedimentological analysis ............................................................... 45
4.2.5. The 3D reconstruction model .......................................................................... 48
5. The environment and archaeology of the broader region (NW Greece, SE Albania and SW FYROM) .................................................................................................................. 51
5.1. Introduction ............................................................................................................. 51
5.2. The regional setting and the climate ...................................................................... 51
5.2.1. The physical setting and current climatic conditions ......................................... 51
5.2.2. The climate in the past ....................................................................................... 54
5.3. Archaeology: Chronology and occupational patterns ......................................... 58
5.3.1. The Pre-Neolithic period .................................................................................. 59
5.3.2. The Early and Middle Neolithic 6800/6500–5800 BC and 5800 to 5300 BC 59
5.3.3. The Late and the Final Neolithic 5300-4500BC and 4500-3200BC ................. 68
5.3.4. The Late Prehistory ........................................................................................... 70
6. Background to the landscape and the prehistoric site of Dispilio .......................... 75
6.1. The research area ................................................................................................. 75
6.1.1. Introduction ....................................................................................................... 75
6.1.2. The Lake ........................................................................................................... 75
6.2. Climate and Vegetation ......................................................................................... 77
6.3. Geology and geomorphological setting ............................................................... 77
6.4. The archaeological site ......................................................................................... 79
6.4.1. The history of research .................................................................................... 79
6.4.2. Stratigraphy and chronology ............................................................................ 80
6.4.3. Previous research ............................................................................................. 82
6.4.4. Vegetation, landscape and economy ............................................................... 85
7. Sediments as indicators of environmental conditions and anthropogenic activities .... 89
