Contents

Chapter 1  11
General Introduction

Chapter 2  23
Ex vivo thickness measurement of cartilage covering the temporomandibular joint

Chapter 3  37
Mechanical stiffness of TMJ condylar cartilage increases after artificial aging by ribose

Chapter 4  57
Diffusion of charged and uncharged contrast agents in equine mandibular condylar cartilage is not affected by an increased level of sugar-induced collagen crosslinking

Chapter 5  73
Aging does not change the compressive stiffness of mandibular condylar cartilage in horses

Chapter 6  91
General Discussion

Appendices  103
