Acknowledgements

Many people have contributed so that this research could deliver the results described in this thesis.

First, I want to start by extending my gratitude to all participants in the project. Your trust and interest for participating made it possible to obtain the results described in this book. The close collaboration with the local social media groups was helpful in order to distribute the necessary information and also in order to communicate with the population. To all, a heartfelt thank you.

Professor Pinedo, it was your dream to set up cervical cancer prevention for Curaçao. The results of this project were of interest for the set-up of the National prevention programme. That is why you searched for someone capable to plan, coordinate and execute the research. Just as my whole population has a lot of respect and admiration for you, for that same reason, I accepted this challenge the moment you came to me with the proposal. With the help of all those who I am mentioning in this acknowledgment, it was possible to deliver the end results discussed in this book and I know this will assist you in further developing of the prevention programme, all in according with your expectations.

Promotors and Co-promotors, I sincerely thank you for your patience, time, support and that you provided me the opportunity including your help to finish this project. Professor Kenter, dear Gemma, your ability to remain calm and kind while achieving a lot of goals in short time, yet so soft and caring is an admirable characteristic that I will keep in mind and will try to master. Professor Meijer, dear Chris, working with you was like a tango choreography between two people. One thing is certain, you have a good heart and also, I now know what research is. Your critical and detailed approach kept me

focused.

Dr. Lissenberg-Witte, dear Birgit, your accuracy in statistical details but also in writing sealed my sense of security that our work will turn into a nice paper. I learned nice things from you. Dr. Quint, dear Wim, your kindness and warm hospitality but also the enthusiastic willingness to help with everything concerned the cervical cancer prevention programme at Fundashon Prevenshon was exceptional. I have learned a lot in your lab. I would also like to thank everyone who had a supervising or mentoring role during the research.

Maurits de Koning, your supervision, constant availability, very wise advises, monitor of all the HPV lab work, made the HPV lab part on Curaçao possible. This has meant a lot to me. Igor Gomes Bravio, we studied medicine at the same university and you know how proud we can call ourselves doctors after graduating as GPs. You also knew about my ambitious plans for the future. Thank you for the sympathy and understanding which has led to some extra patience while working with me in this situation. Also, your cooperation with the clinical support, advices and support with data for this research had a significant added value.

Professor Hans Berkhof, math seemed like magic to me when it was done by you. It helped in taking away my fear for math and I am extremely grateful for that.

It was a great pleasure to experience the whole team at DDL Laboratories, Rijswijk, who trained me and assist with everything necessary for the HPV typing in the Netherlands and also on Curaçao. Daan Geraets, Jacqueline Roer, and Leonie van den Berg, your mentoring was great. I also thank Dr. Jean Paul Rovers and colleagues at Alland vrouw clinic, Spaarnziekenhuis Hoofddorp. Cancer Center Amsterdam, Dr. Steenberg (Renske), for always being there and giving very useful comments and advises.

Dr. Rose Mary Allen and Dr. Artwell Cain, it was an interesting experience to work and to learn from both of you about conducting research in Anthropology and Sociology sciences, but most important to me was to experience the linkage between your expert field and mine.

Dr. Carmen Coronel, in fact this book must be dedicated to you. I have the impression that many are not aware of the impact of your efforts for the benefit of the Curaçao population's Public Health. During the last two months, I had the honor to even more appreciate your knowledge and argumentations in close collaboration. I am very grateful for this. In my opinion, your huge commitment with keeping cancer data registration and promoting cancer prevention on Curaçao must be acknowledged.

I would like to thank the reading committee for investing their valuable time in this project and for critically reviewing this book.

With a grateful heart, I would also like to thank everyone who collaborated in one way or another with work, data or expert advices. I like to start with the personnel and management team of Fundashon Prevashon. The initiation of this project was two years of hard work and without your commitment it would not have been possible to fulfill my stipulated goal of delivering the data within the agreed time.

Register department of Curaçao, especially Mr. Raymond (Pacheco) Römer, who provided the access for us to reach the female population. Curaçao Bureau Statistiek (CBS), with special thanks to Leander Kuijvenhoven for his enormous effort to import the scientific data into SPSS. All local family practitioners and gynaecologists who collaborated. Vanessa Elisa, Norediz Lourens, Geraldine Christina and Professor Serving Keli who provided information about the National medical statistical data and about the local healthcare system applied in the previous years and now. National lab Analytic Diagnostic Center (ADC), who facilitated the use of the molecular

biology lab for the HPV assays which was the main aim connected to our research. Also, a big thanks goes to the department of Pathology and the department of Pre Post Analytische Werkzaamheden (PPAW) of ADC. Social Security Bank Curaçao (SVB), personnel and management team with a special thanks to Enneline Balootje-Zimmerman, who invested much time looking up all the required data and verifying data when that was necessary. You worked overtime if necessary and with such a patience and love projecting the clear sensations of a noble citizen for your country. Integraal Kanker Centrum Nederland (IKNL), with special thanks to Otto Visser who collaborated with data and valuable suggestions for comparison of cervical cancer data from the former Dutch Caribbean population in the Netherlands with European Dutch population in the Netherlands and cervical cancer data on Curaçao.

With the help of Odette van Brummen- Girigori and Auronette Girigori, it was possible to perform the statistical analysis of the additional data with regard to chronic diseases and medication use in our population. Dr. van Brummen-Girigori also helped with scientific literature on researches in social behavioural science conducted on Curaçao and she also helped with the approach and revision of chapter 2.

Dr. Kim Ardts, I was lucky you helped me with HPV genotyping during the large trial.

Olga Rojer, Nicole Miller, Henk Broxterman, Suzanne Huender your input and advises with regard to my writing has meant a lot to me. Also to all colleagues and fellow PhD students who were always available to answer all my questions.

Radjiv Betrian, for helping me with creating support videos with information about HPV, cervical cancer and information about clinical trials and expectations during the trials.

Ashwant Gonesh for helping me with the webpage. Lucy Ambarwati, for your very wise advises with regards to data management. Sally Rhuggenaath and Arellys Rochas for the set up and technical support around the FP's Facebook page. Stephanie Hasham, your help all the ways from the USA, with layout of various information materials, PowerPoints and scientific posters, meant a lot to me.

Lucila Phelipa, voluntarily checked and if necessary corrected all the leaflets and booklets with information for our awareness campaign. Eunice Eisdien, providing me with your study material and knowledge, but also the love that radiates from your eyes once you knew that we are making efforts for the welfare of Curaçao was really motivating. Camile Ragin, your orientation and guidance in research and epidemiology info in the Caribbean region was truly helpful.

I want to extend a special thanks to A. Poulino, D. Reenis, N. Schaarbaai, I. Filomena, M. Lourencia, L. Mercera, N. Kooij, A. Capriles, E. Benita, H. van den Munckhof, F. Isabella, L. Juffermans, Janneke Wilschut, Mr. A. Maduro (MD) and Campo Alegre Curaçao. Your assistance and support throughout the research period were of great value.

Lucille Berry-Haseth is well-known as a legend for the promotion of our local language Papiamentu which she promoted with her delightful talent as an author, poet and orator. For me it is an honor that the dissertation summary in Papiamentu has been translated by her. The correspondence with her during the translation work was as sweet as her voice when she reads a poem.

Ronisa Harris, thank you for your warm hospitality on my arrival in the Netherlands in January 2013.

Glenn Helberg, I thank you for believing in me and for encouraging me to continue believing in myself. You are truly exceptional.

Thathiana Rodrigues and Heinz Angela your help with organizing and making it possible to visualize the data was essential in order to continue with the

project. Heinz, I am still figuring out what amaze me the most, your expertise in handling data or the love you have for your work. Thanks for converting the data into geodata.

Jerson Martina, despite of your busy schedule, you always cared, kept the track in my walk and provided help when needed. Your always optimistic charm and patience helped me find the balance in my feelings.

Eunice Anita-Offerman, an A4 is little to describe all the things we have done in the past 2 years, how special you are in general and to me. You are so amazingly highly skilled. What you have done has meant a lot to me but also to the island. I thank you from the bottom of my heart.

Gedeona Maduro, looking back at all the years and things we have done together and how we continue growing and supporting each other in good days and in bad days makes me realize how lucky I am.

Jeanne Koeijers, we are first line cousins and I love you but in work I have much respect for you, doctor. I am so proud of you and I look up to you.

All my family and friends in Curaçao and the Netherlands; Hooi, Plaate, Quereshi-Plaate, Matos, Benito Dolorita, Kristal Bronswinkel, Dan Milstein, Jevinne Noordhof, Leila Ayubi Oleana, Gordon Greer, Lourdes Bor, Priscela de Lanoy Martines, Stacey Willems, Radjwant Gonesh, Rita de Lanoy-Timp, Magdalena Celestina, Desiree and Mo Sahib, Kamna Mirpuri, thank you for the loving support.

Bernard Whiteman, this is my humble work for our population's Public Health as you always stated that I had to make a positive contribution. That statement came from the bottom of your heart showing your sincere and warm care for the island.

Louise Elstak, you encouraged me to take this challenge when I did not have a clue what this was all about and what to expect. I trusted you and blindly followed all your advises. We worked restless days and nights with no

distinctions in weekdays, weekends or even holidays, to put thoughts, ideas and ability into comprehensible text. To get to know you was a very interesting experience.

Dear Mr. and Mrs. Kramer, the financial support played an important role during this research. In addition, I have greatly appreciated your attention and sympathy with the project, with me and most important with my island. The population is surely be grateful for your lovely care and contribution to progress.

My appreciation goes to all who during the research years have provided financial or any type of support to Fundashon Prevension and more especially for this study.

Mom, Dad, Tio Rudy, words cannot express all my gratitude for your endless love and support.

Curriculum Vitae

Desiree J. Hooi was born on May 17th, 1982 in Willemstad, Curaçao. After obtaining her degree as a Registered Nurse at the Instituto pa Formashon den Enfermeria (IFE) on Curaçao, she worked for four years at the Taams Clinic and the first aid department at the St. Elisabeth Hospital.

In 2005, she moved to Costa Rica to study medicine at the Universidad de Ciencias Medicas (UCIMED). During her studies she gained experience in departments of Internal medicine, Surgery, Paediatrics, Gynaecology & Obstetrics, Psychiatry, Pathology & Forensic pathology, Family practice and Emergency medicine.

In 2011, she obtained her degree in medicine and returned to Curaçao where she worked for one and a half year as a family practitioner and insurance physician. She worked also for 5 months at the department of Neurology in the St. Elisabeth hospital, Willemstad Curaçao.

In November 2012, Desiree J. Hooi was approached with the request to conduct a scientific study under the female population on Curaçao. Aware of the priority and needs of local epidemiological data and medical guidelines based on evidence obtained from the local population, she gave priority to her nation and accepted the challenge.

In January 2013, she started the research at the prevention centre named Fundashon Prevenshon located in Otrobanda. She moved to the Netherlands in 2016 to analyse and to describe the findings of the research. This was done at the Pathology department of Cancer Centre Amsterdam (CCA), which is a research division of the Academic Hospital of Amsterdam UMC.

During her stay on Curaçao, Hooi has provided voluntary service to the Red Cross, Organization for diabetic patients SOKUDI, institutions for children

with complex behaviours and social-psychological problems, numerous information programmes for various organizations, newspapers, TV and radio programmes.

With each heartbeat so many things come and at the same time so many things vanish.

Norman Rudy Plaate (February 5th, 1937)

A phrase cited from the song "Oloshi"
which is the Papiamentu term for a clock.

Je le pansai, Dieu le guérit

“I treated him, and God healed him.”

— **Ambroise Paré**
1510-1590
