Account 8  
Abbreviations 9  
Preface 11  

PART 1. Setting the stage: the promise of mHealth  
CHAPTER 1. Introduction 17  
1.1 Quality of Antenatal care 18  
1.2 Barriers to the provision of quality antenatal care 20  
1.3 Bridging the quality gap in antenatal care: the promise of mHealth 22  
1.4 Focus of the thesis 23  

CHAPTER 2. Research Framework and Questions 27  
2.1 Research framework 28  
2.2 Research questions 30  

CHAPTER 3. Research Design 33  
3.1 Research methodology 34  
3.1.1 Streams of inquiry 34  
3.1.1a The theoretical stream: evidence synthesis 34  
3.1.1b The empirical stream: evaluation of a diagnostic and clinical decision support device 35  
3.1.1c The reflection stream: the whole is greater than the sum of its parts 41  
3.2 Research validity 43  
3.3 Ethical considerations 44  
3.4 Thesis outline 44  

PART 2. Findings: from promise to potential  
CHAPTER 4. mHealth for Clinical Decision-Making in Sub-Saharan Africa: A Scoping Review 55  
4.1 Introduction 57  
4.2 Methods 58  
4.3 Results 61  
4.4 Discussion 70  
4.5 Conclusions 73  

CHAPTER 5. Viability of diagnostic decision support for antenatal care in rural settings: findings from the Bliss4Midwives Intervention in Northern Ghana 81  
5.1 Introduction 83  
5.2 Methods 84  
5.3 Results 87  
5.4 Discussion 94  
5.5 Conclusions 97  

CHAPTER 6. Mobile health and the performance of maternal health care workers in low- and middle-income countries: A realist review 103  
6.1 Introduction 105  
6.2 Methods 106  
6.3 Results 110  
6.4 Discussion 117  
6.5 Conclusions 120  

CHAPTER 7. Unravelling the black box of mHealth: Realist evaluation of a digital innovation for antenatal care 127  
7.1 Introduction 129  
7.2 Methods 130  
7.3 Results 135  
7.4 Discussion 142  
7.5 Conclusions 145
CHAPTER 8. Pregnant women’s experiences with an integrated diagnostic and decision support device for antenatal care in Ghana

8.1 Introduction
8.2 Methods
8.3 Results
8.4 Discussion
8.5 Conclusions

PART 3. Reflections: from potential to reality

CHAPTER 9. Discussion and Conclusion

9.1 The end of Mariama’s pregnancy experience
9.2 What is the evidence on the use of mHealth, specifically diagnostic and clinical decision support systems, in low-resource settings?
9.3 How does mHealth, specifically diagnostic and clinical decision support systems, influence the performance of maternal health workers in low-resource settings?
9.4 How do pregnant women experience mHealth, specifically diagnostic and clinical decision support systems for ANC, in low-resource settings?
9.5 Contributions of Theoretical findings to Research framework
9.6 Implications for Practice
9.6.1 Validity and reliability of point-of-care diagnostic tools
9.6.2 Task-shifting with mHealth
9.6.3 Decision-making conflict: mind-lines versus e-lines
9.6.4 Technical limitations and the Ethics of mHealth
9.6.5 Referral linkages
9.6.6 Health systems and enabling contexts
9.7 Sustainability of mHealth in LMICs
9.8 Methodological reflections
9.9 Recommendations for future research
9.10 Concluding remarks

Appendices
Appendix 1 - Usability Questionnaire
Appendix 2 - Search Strategy, Scoping Review
Appendix 3 - Search strategy for different databases, Scoping Review
Appendix 4 - Detailed profile of reviewed studies
Appendix 5 - Review Terms, Search Strategy and Exclusion Criteria, Realist Review
Appendix 6 - Realist review: Framework in progress
Appendix 7 - Data collection activities and Respondents
Appendix 8 - Facility checklist for ANC service provision
Appendix 9 - Characteristics of B4M users and Usability survey scores
Appendix 10 - Question Guide Client Exit Interviews
Appendix 11 - Question Guide In-depth Interviews, Bliss4Midwives (B4M) users
