The weight of depression:
epidemiological studies into obesity, dietary intake and mental health

Deborah J Gibson-Smith
This thesis was prepared at the department of Research and Innovation at GGZ inGeest, and the department of Psychiatry, VU University Medical Center, Amsterdam, within the Amsterdam Public Health Institute.

This work performed on this thesis was supported by the EU-MoodFood grant. Funding for this research is provided by EU FP7 MooDFOOD Project ‘Multi-country cOllaborative project on the rOle of Diet, FOod-related behaviour, and Obesity in the prevention of Depression’, Grant agreement no. 613598.

The infrastructure for the NESDA study (www.nesda.nl) has been funded through the Geestkracht program of the Netherlands Organisation for Health Research and Development (Zon-Mw, grant number 10-000-1002); and participating universities (VU University Medical Center, Leiden University Medical Center, University Medical Center Groningen).

The HELIUS study is conducted by the Academic Medical Center Amsterdam and the Public Health Service of Amsterdam. Both organisations provided core support for HELIUS. The HELIUS study is also funded by the Dutch Heart Foundation, the Netherlands Organization for Health Research and Development (ZonMw), the European Union (FP-7), and the European Fund for the Integration of non-EU immigrants (EIF).

The Age, Gene/Environment Susceptibility-Reykjavik Study is funded by NIH contract N01-AG-12100, the NIA Intramural Research Program, Hjartavernd (the Icelandic Heart Association), and the Althingi (the Icelandic Parliament).
