Contents

1. Introduction to the “Finding the limits of the limes” project 1
   1.1. Research outline 2

2. Current state of knowledge 3
   2.1. The Lower Rhine delta from Late Iron Age to Middle Roman period: the political and geographical context 3
   2.2. Settlement history 5
   2.3. Workforce and population size 5
   2.4. Palaeogeographic context 6
   2.5. Archaeobotanical and zooarchaeological evidence 6
   2.6. Diet and economy: animals and plants 8
      2.6.1. Staples and non-staples 8
      2.6.2. Arable farming in the Dutch limes region 11
      2.6.3. Provenance of plants 11
      2.6.4. Main livestock 12
      2.6.5. Other animals 14
   2.7. Fuel and timber collection 14
   2.8. Surplus production in the Dutch Roman limes zone 15
      2.8.1. Recent modelling approaches of the local economy 16
   2.9. Overview 16

3. Research motivation, aims and objectives 18
   3.1. Evaluation of previous research and scope for development 18
   3.2. Research aims 18
   3.3. Research objectives 19

4. Methodology 21
   4.1. Introduction to agent-based modelling 21
   4.2. Introduction to ROMFARMS: key features 23
   4.3. Overview of sub-models: assumptions and processes 24
      4.3.1. Settlements 24
      4.3.2. Landscape 25
      4.3.3. Population dynamics 26
      4.3.4. Arable farming 32
