List of abbreviations 8

Chapter 1 General introduction and outline of this thesis 9

Part I Leukoencephalopathy with brainstem and spinal cord involvement and lactate elevation (LBSL) 27

Chapter 2 Leukoencephalopathy with brainstem and spinal cord involvement and lactate elevation: clinical and genetic characterization and target for therapy 27

Chapter 2.2 Reply: DARS2 gene clinical spectrum: new ideas regarding an underdiagnosed leukoencephalopathy 53

Part II Megalencephalic leukoencephalopathy with subcortical cysts (MLC) 59

Chapter 3 Megalencephalic leukoencephalopathy with subcortical cysts: characterization of disease variants 59

Part III Hypomyelination with atrophy of the basal ganglia and cerebellum (H-ABC) 79

Chapter 4 Hypomyelination with atrophy of the basal ganglia and cerebellum: further delineation of the phenotype and genotype-phenotype correlation 79

Chapter 4.2 Reply: TUBB4A novel mutation reinforces the genotype-phenotype correlation of hypomyelination with atrophy of the basal ganglia and cerebellum 109

Chapter 4.3 Reply: A novel TUBB4A mutation suggests that genotype-phenotype correlation of H-ABC syndrome needs to be revisited 115

Chapter 5 UFM1 founder mutation in the Roma population causes recessive variant of H-ABC 119

Part IV Vanishing White Matter (VWM) 143

Chapter 6 The natural history of Vanishing White Matter (1): disease course 143

Chapter 7 The natural history of Vanishing White Matter (2): quality of life 167

Part V Conclusions

Chapter 8 Summary and general discussion

Part VI Appendices

Chapter 9 Nederlandse samenvatting

Overview of publications
