Summary 11
Introduction 13

Part I: Gut microbiota profiling using IS-pro in the lab: The TIM-2 in vitro colon model

❖ Chapter 1: Evaluation of an optimal preparation of human standardized fecal inocula for in vitro fermentation studies. 25
❖ Chapter 2: Diet drives quick changes in the metabolic activity and composition of human gut microbiota in a validated in vitro gut model. 49

Part II: Gut microbiota profiling using IS-pro in the clinic: antibiotic treatment as a case study

❖ Chapter 3: Neonatal microbiota development and the effect of early life antibiotics are determined by two distinct settler types. 77
❖ Chapter 4: The effect of antibiotics on the gut microbiota of diverticulitis patients. 97

Part III: Gut microbiota profiling using IS-pro in diagnostics: IBD as a case study

❖ Chapter 5: Robust microbiota-based diagnostics for inflammatory bowel disease. 117
❖ Chapter 6: Interpretation of microbiota-based diagnostics by explaining individual classifier decisions. 141
