Contents

Chapter 1  General introduction  9

Chapter 2  The determinants of reduced dietary intake in hospitalised colorectal cancer patients  19

Chapter 3  The effect of individualized NUTritional counseling on muscle mass and treatment outcome in patients with metastatic COLOrectal cancer undergoing chemotherapy: a randomized controlled trial protocol  37

Chapter 4  The effect of individualized NUTritional counseling on muscle mass and treatment outcome in patients with metastatic COLOrectal cancer undergoing chemotherapy  53

Chapter 5  Cancer cachexia: identification by clinical assessment versus international consensus criteria  73

Chapter 6  Percentiles for skeletal muscle index, area and radiation attenuation based on computed tomography imaging in a healthy Caucasian population  89

Chapter 7  Skeletal muscle analyses: agreement between non-contrast and contrast CT scan measurements of skeletal muscle area and mean muscle attenuation  113

Chapter 8  Insight in taste alterations during treatment with protein kinase inhibitors  127

Chapter 9  Patient-reported taste alterations are not related to objective taste and smell changes during treatment with protein kinase inhibitors  147

Chapter 10  General discussion  157

Addendum  Summary  172

Samenvatting  175

Dankwoord  179
