Preface v

1 Introduction 1

2 Domestic market power in the international airline industry 7
  2.1 Introduction ........................................... 7
  2.2 Identification strategy ................................ 12
  2.3 Data ...................................................... 13
    2.3.1 Primary data collection ............................. 14
    2.3.2 Secondary data ...................................... 17
    2.3.3 Descriptive statistics ............................... 18
    2.3.4 Preliminary evidence ............................... 20
  2.4 Empirical analysis ..................................... 23
    2.4.1 Model specifications ............................... 23
    2.4.2 Estimation results .................................. 26
    2.4.3 Robustness checks .................................. 30
    2.4.4 Discussion .......................................... 34
  2.5 Conclusion ............................................. 36
  2.A Data collection setup .................................. 38
  2.B Supplementary figures .................................. 39
  2.C Supplementary estimation results ....................... 41

3 Airline loyalty (programs) across borders 43
  3.1 Introduction ........................................... 43
  3.2 Setting and data ...................................... 47
    3.2.1 Spatial setting ..................................... 47
    3.2.2 Data ................................................ 48
List of Figures

2.1 Stylized route network of a European carrier .......................... 13
2.2 Map of sampled European origin airports ............................... 15
2.3 Domestic versus foreign fares by carrier ............................... 20
2.4 Domestic versus foreign fares by destination ........................... 20
2.5 Domestic versus foreign fares by Saturday-night stayover .......... 21
2.6 Domestic versus foreign fares by booking days ........................ 22
2.7 Domestic versus foreign fares by length-of-stay ........................ 22
2.8 Domestic and foreign fares by market shares ............................ 23
2.9 Domestic versus foreign fares by carrier and booking days .......... 39
2.10 Domestic versus foreign fares by destination and booking days .... 39
2.11 Domestic and foreign fares by Saturday stayover and booking days 40
2.12 Domestic versus foreign fares by length-of-stay and booking days 40
2.13 Domestic and foreign fares by market shares and booking days .... 40

3.1 Outcome variables around the border ....................................... 58
3.2 Market and regional characteristics around the border ................ 59
3.3 Member characteristics around the border ................................ 60
3.4 Bandwidth plots for discontinuity effects ............................... 63
3.5 Degree of urbanization around the border ............................... 68

4.1 Distribution of codeshare (mis)conceptions ............................. 78
4.2 Distribution of risk indicators ............................................. 78
4.3 Willingness-to-pay for carriers by codeshare (mis)conception ...... 91
4.4 Willingness-to-pay for carriers by risk-aversion ....................... 92
4.5 Willingness-to-pay for carriers by risk-aversion (non-linear) ....... 93
4.6 Example of stated preference choice task ............................... 97
# List of Tables

2.1 Fare data collection dimensions ............................................. 14  
2.2 Descriptive statistics .......................................................... 19  
2.3 Baseline model estimation results ......................................... 27  
2.4 Interaction model estimation results ..................................... 29  
2.5 Interaction model robustness checks .................................... 31  
2.6 Data collection schedule (top and bottom) ............................. 38  
2.7 Full baseline model estimation results .................................. 41  
2.8 Full interaction model estimation results ............................... 42  

3.1 Description of variables ....................................................... 49  
3.2 Descriptive statistics .......................................................... 50  
3.3 Baseline model estimation results ......................................... 61  
3.4 Sensitivity overall program activity and extensive margin ........ 64  
3.5 Sensitivity intensive margins ............................................... 65  

4.1 Flight characteristics and levels .......................................... 74  
4.2 Typology of flight products .................................................. 74  
4.3 Sample descriptives ............................................................. 77  
4.4 Multinomial and panel mixed logit estimation results ............ 85  
4.5 Additional panel mixed logit estimation results ..................... 87  
4.6 Hybrid panel mixed logit estimation results ........................... 89  
4.7 Correlation matrix risk indicators ....................................... 97  
4.8 Measurement and structural models estimation results ............ 98  
4.9 Initial multinomial and panel mixed logit estimation results .... 99  
4.10 Hybrid panel mixed logit robustness checks ......................... 100
