CONTENTS

Chapter 1 General introduction 7

Part I: Pathophysiological aspects of systemic lupus erythematosus 23

Chapter 2 Comprehensive approach to study complement C4 in systemic lupus erythematosus: gene polymorphisms, protein levels and functional activity 25

Chapter 3 Fc-gamma receptor polymorphisms differentially influence susceptibility to systemic lupus erythematosus and lupus nephritis 45

Chapter 4 Exosomes targeting tubular epithelial cells activate TLR3-mediated antiviral immunity via small RNA delivery in lupus nephritis 71
*Submitted*

Part II: Clinical aspects of systemic lupus erythematosus 93

Chapter 5 Both prolonged remission and Lupus Low Disease Activity State are associated with reduced damage accrual in systemic lupus erythematosus 95
*Rheumatology (Oxford). 2017;56(1):121-8*

Chapter 6 The relationship between remission and health-related quality of life in a cohort of SLE patients 113

Chapter 7 Longterm evaluation of antimalarials in a Dutch SLE cohort: intolerance and other reasons for non-use 131
*Clin Exp Rheumatol. 2014;32(1):95-100*

Chapter 8 Summary 145

Chapter 9 Discussion and future perspectives 155

Chapter 10 Nederlandse samenvatting 163
